

Business Continuity Planning at Chesapeake IRB

No one wants to think about disasters, but disaster planning is necessary to ensuring the life of our projects. Business Continuity requires a multi-faceted solution: one that addresses both the physical requirements for data back-up, storage, and access and the human needs of communication. At Chesapeake, our Business Continuity Plan addresses these and more.

Contact us for more details about Business Continuity at Chesapeake.

We want to be your IRB of choice. Please call us about your next study.

Jennifer Stephenson, Business Development Coordinator
